SUMMARY SHEET

SUMMARY OF IMPACT ASSESSMENT SCREENING

Policy Fees & Charges – Income Generation
Lead service Community and Customer Services
Contact person for screening process Scott Grant – Service Manager Nithsdale
Date of screening process Tuesday 8th November 2011

Names of those involved in screening process Chris Topping, Health & Wellbeing Unit (NHS) Claire Aitken, Team Leader Communications Liz Manson, Corporate and Community Planning Manager Scott Grant, Service Manager, Nithsdale

Recommendations from the screening process (include total number of positive, neutral and negative impacts see Q.12-21). Any effect or possible effect on the physical environment should also be noted. (See summary at Q.23) Impact summary – **0** positive, **5** negative, **6** neutral **Disability –negative - medium.** There is a regional branch of Disability Sport that provides a structure for those wishing to participate in sport. Although there is a reduction in the benefit offered to disabled users it should be recognised that the benefit is not being removed but reduced i.e. 50% -to 25% **Age – negative – medium.** Pre payment plans/longer time to pay could be offered to support those registering a death. This would reduce the immediate financial impact. **Economic sustainability – negative – low.** Although the increases mean the Council's leisure rates are high in comparison to other Councils, they are still lower than local private sector providers. Other increases are minimal. **Social Sustainability – negative – medium.** Greater promotion of free events could mitigate the small increases in charges for arts and cultural events. **Health – negative – medium.** –Public Health practitioners may be able to provide greater support around health related participation and other initiatives including Health Working Lives will support employee's health

Summary of actions arising from the screening process
